

MCI Replacement Fiberglass Doors & Exterior Panels

Information Sheet

GENUINE OEM

Why Sacrifice Quality, Fit and a Clean Finish?

Replace your damaged doors and panels with MCI's OEM replacement body parts. No research time or labor will need to be spent on looking up hardware parts or salvaging bracketry off your damaged doors. When purchased from MCI, door and panel assemblies come ready for installation and already prepared up to the final primer application.

Fiberglass is sealed with light gray enamel | Outer skin is ready for primer and paint coats | Stainless steel bracketry
Vents perfectly rounded, clear of debris, and primer covered

FREE GROUND FREIGHT

MCI OE fiberglass products are produced using a closed mold process called Light RTM (Resin Transfer Mold). By using this process, MCI is able to achieve:

1. Proper & consistent part thickness
2. Proper glass ratio that results in a more dimensional & cosmetically stable part
3. Consistent degree of cure that produces a part that has high durability and weather-ability
4. Dimensional stability
5. Accurate location of inserts and fittings

Some fiberglass will-fitters will utilize the open mold process to provide a lower cost part but all of the above is sacrificed which can create an unfinished look once installed on your coach.

Information on this sheet is subject to change at the discretion of MCI and/or its affiliates. Contact your MCI parts solutions manager or customer service representative for further details.
