

MP-1200HD

Digital Media Player with Priority/Safety Messaging

The most versatile of our digital media players, REI's MP-1200HD is a powerful unit that allows for true 1080p high-definition playback with priority safety message override and DOT compliance logging. It has the ability to play up to four strings of digital announcements and features external I/O triggering that activates messages automatically when events like door openings and wheelchair lifts occur. Affordable and robust, the MP-1200HD is a reliable option for playing back your safety, entertainment and advertising messages.

Applications:

- Passenger safety announcements
- Advertising – cross-promote trip tours and events
- Infotainment
- Scenic tour videos
- Automatic and continuous-play announcements
- Stop/start priority messages with remote play button

Features:

- True 1080p high-definition playback
- Priority message override
- DOT compliance logging
- AUX audio and video inputs to interface with existing entertainment systems
- Automatic and continuous playback
- Easy-to-use interface
- Multilingual audio playback
- USB file transfers

Our products are backed with REI's 24/7/365 Technical Support and we offer an outstanding Warranty and Warranty Exchange Program that are unmatched in the industry.
