

# ADB22X Brake System Components for MCI J4500 2015+

INFORMATION SHEET

nfi.parts

**Complete system solutions with advanced features for long life service**

## FEATURES

- Serviceable components
- Hardened carrier abutments
- Even wear pads

Adjuster nut is retained in the chain cover to prevent it from falling out.

The rubber adjuster cover is connected to a lanyard to prevent misplacement during maintenance work.

Hardened carrier abutments minimize the risk of pad abutment damage, maintain good pad sliding, and increase the life of the carrier and brake pads.
