OE Approved airflow filter with over 99.95% effectiveness in eliminating viruses and bacteria

**FEATURES**

- Flow-rate tested and approved for MCI brand coach applications - will not harm fan motor
- No modifications needed - no need for filter frame reconstruction, can be cut and installed in existing filter assemblies
- UL 900, and ASHRAE Compliance
- Manufacture recommends a 3 month replacement schedule
- Typical coach uses ~10ft of material
- No shelf life for the anti-microbial coating – does not degrade over time

**How It Works**

Copper ions weaken the amino acids of the cell wall allowing silver to invade the cell. The Copper and silver then react with key enzymes to cause sterilization, suffocation and starvation of the pathogen.

**Patented-protected**

PuraWard® Antimicrobial Fiber Layer (PWF) - Kills 99.95% viruses by using a copper and silver ion property

**Also Available**

Merv8 Filter Roll Without Antimicrobial Layer

Add ventilation and improve passenger comfort.

The power safety vent is a combination emergency exit and roof ventilator that utilizes the built-in electric fan for extracting condensation, stale or hot air from inside the vehicle to improve passenger safety.

FEATURES

• Constructed of high strength UV stable materials

• Universal fit application - fits most transit buses and motor coaches (MCI VIN 65000+) with an existing 24” x 24” manual roof hatch (not compatible with the motorized roof hatches)

• Creates a powerful airflow and cross breeze with a durable low profile fan

• Available in white (typical transit applications) or gray (typical motor coach applications) interior color

UV-C Lighting Kits

INFORMATION SHEET

The smart answer to reducing viruses, bacteria and mold in the HVAC system.

Durable, cost effective and reliable. Offers an improved safety focused environment for drivers and passengers.

FEATURES

• High-cycle commercial grade ballast
• Simple installation into most main evaporator compartments
• UV-C lamp reduces viruses, bacteria, and mold in the air and on the HVAC coil by 99.9%
• Does not use harmful chemicals
• Produces no pollution
• Powered by high-powered ballast in a conveniently small size

Kits contain dedicated 110V inverter for the light system. All harnessing and mounting hardware included.

An EPA registered broad-spectrum disinfectant and multi-purpose cleaner. It offers a safe and effective approach to the disinfection of a variety of surfaces throughout the vehicle while cleaning multi-soils leaving behind a clean, streak and haze free surface.

**FEATURES**

- Biodegradable
- Non-toxic and non-corrosive
- No quaternary ammonium compounds
- Water based, contains no volatile organic compounds (VOCs)
- Does not contribute to an accumulated grimy/dulled appearance
- Highly effective performance—shows substantial soil removal and minimal soil re-deposition—contains agents that prevent soil re-deposition and make subsequent cleaning easier
- Safe for use on glass, mirrors, metal, plastic, leather, fabric, and carpet
- Non-reactive to and fully compatible with all known fire retardant thermoplastics

- Fresh Air Circulating Roof Vents
- On-Board Hand Sanitizer
- On-Board Mask Dispenser
- Physical Distancing Partitions
- Disinfecting Technology

FEATURES

- Easy peel and stick window cling
- Pick and choose the safety items where you have invested

How It Works

Select the products you employ in your safety program from the window cling sheet.

Deactivates SARS-CoV-2 virus by sanitizing the AIR AND SURFACE without leaving any harmful residues!

Results from a study done by the University of Florida using the SARS-CoV-2 virus (which causes COVID-19) show after continuous exposure to this technology the virus becomes inactive.

Fully contained unit replicates nature’s eco-friendly purification process indoors by converting Air & Humidity into High Energy Clusters (HEC) and Advanced Bi-Polar Ion Oxidizers. Air is passed across proprietary UVX light and 6 metal honeycomb matrix, which is amplified by enhanced specular reflection, delivering unmatched pathogen elimination in the air and on surfaces.

Continuous disinfection from this unit promotes ridership confidence. No down time or additional cleaning during service

FEATURES

- Effective on viruses, bacteria, mold, fungus, VOCs, mildew & odors
- Easy to install and maintain, can be placed in various locations on the vehicle - uses 12V DC power
- Buy America Compliant
- Easy filter replacement every three months, cell replacement once every year
- Does not void supplier warranty of HVAC systems
- One Year Warranty

Is it **Safe?**

System is certified as safe to use in occupied spaces, validated by leading independent laboratories and health organizations globally.

Extensively tested and qualified under the rigorous standards of CDC, OSHA, FDA, and the EPA. In fact, successful testing at the University of Florida shows its technology deactivates SARS-CoV-2, the virus that causes COVID-19, as well as deactivating coronavirus 229E.

---

**How it Works**

Air + Humidity $\Rightarrow$ HEC + Oxidizers

This active technology creates High Energy Clusters (HEC) and Advanced Bi-Polar Ion Oxidizers that destroy dangerous pathogens at the cellular level in the air we breathe and on the surfaces we touch. This unit works on its own while the vehicle is in use. Does not require additional downtime or disinfecting labor during service.

---

**Air and Surface!**

The system continuously purifies Air AND Surfaces.

Air flows in to the unit creating HEC and Oxidizers that leave the system and attack pathogens in the air and on surfaces.
The Details:

- Disinfects without down time or additional cleaning during service; once it has been installed and the vehicle is running, it continuously disinfects while the vehicle is on the road
- Continuously disinfects air AND surfaces including hard to reach places while the vehicle is in service
- Effective on viruses, bacteria, mold, fungus, VOCs, mildew & odors
- Proven effective against SARS-CoV-2 (which causes COVID-19) & Coronavirus 229E by University of Florida, Department of Medicine
- Coverage range is up to 30,000 cubic feet (60’ transit bus is approx. ~4,000ft³)
- Extensively tested using the standards of FDA, CDC, EPA, OSHA, KSU, UofF, NSF
- Safe to run with passengers onboard the vehicle
- Unit is visible to riders, building confidence regarding their safety
- Does not leave harmful residue
- Easy to install and maintain, can be placed in various locations on the vehicle
- Technology is contained within unit
- Does not void supplier warranty of HVAC systems
- Does not impact other vehicle systems
- Buy America Compliant
- Easy filter replacement every three months, cell replacement every 12-18 months depending on your fleet’s actual operational duty cycle
- One Year Warranty

The Research: The Most Validated Purifier on the Market

Researchers at the University of Florida, Department of Medicine found that the proactive air and surface purification technology inactivates 73.33% of infectious high levels of SARS-CoV-2 on stainless steel surfaces within only 15 minutes of exposure to the technology, 93.3% after 60 minutes, 97.7% after 4 hours, and undetectable with 24 hours of exposure.*

Results from the University of Florida study are consistent with those of an independent study done by Central Michigan University and Insight Research Institute which tested the effectiveness of the technology using cell cultures of coronavirus 229E and dengue, both used as surrogate viruses for SARS-CoV-2. This study concluded that there were morphological changes that had realigned the monolayer of A549 cells, seen in coronavirus 229E after exposure to this technology.

It is unique from other disinfection technologies (chemical cleaning, UV light, vaporized hydrogen peroxide) because it is used continuously. There are no downtime periods, chemical handling procedures, harmful residues, room clearance protocols, manpower requirements or adverse side effects. Using ambient air, the technology creates non thermal plasma that reduces pathogens safely while people are in the vehicle. It is the most validated purifier on the market. In addition to SARS-CoV-2, this technology has also been shown to be effective against many other pathogens including H1N1, E. coli, MRSA, Listeria, c difficile, staph, etc.
